

Essential habitat for sardine juveniles in Iberian waters

Sílvia Rodríguez-Climent, Maria Manuel Angélico, Vítor Marques, Paulo Oliveira,
Laura Wise, Alexandra Silva

Supplementary material

A: salinity

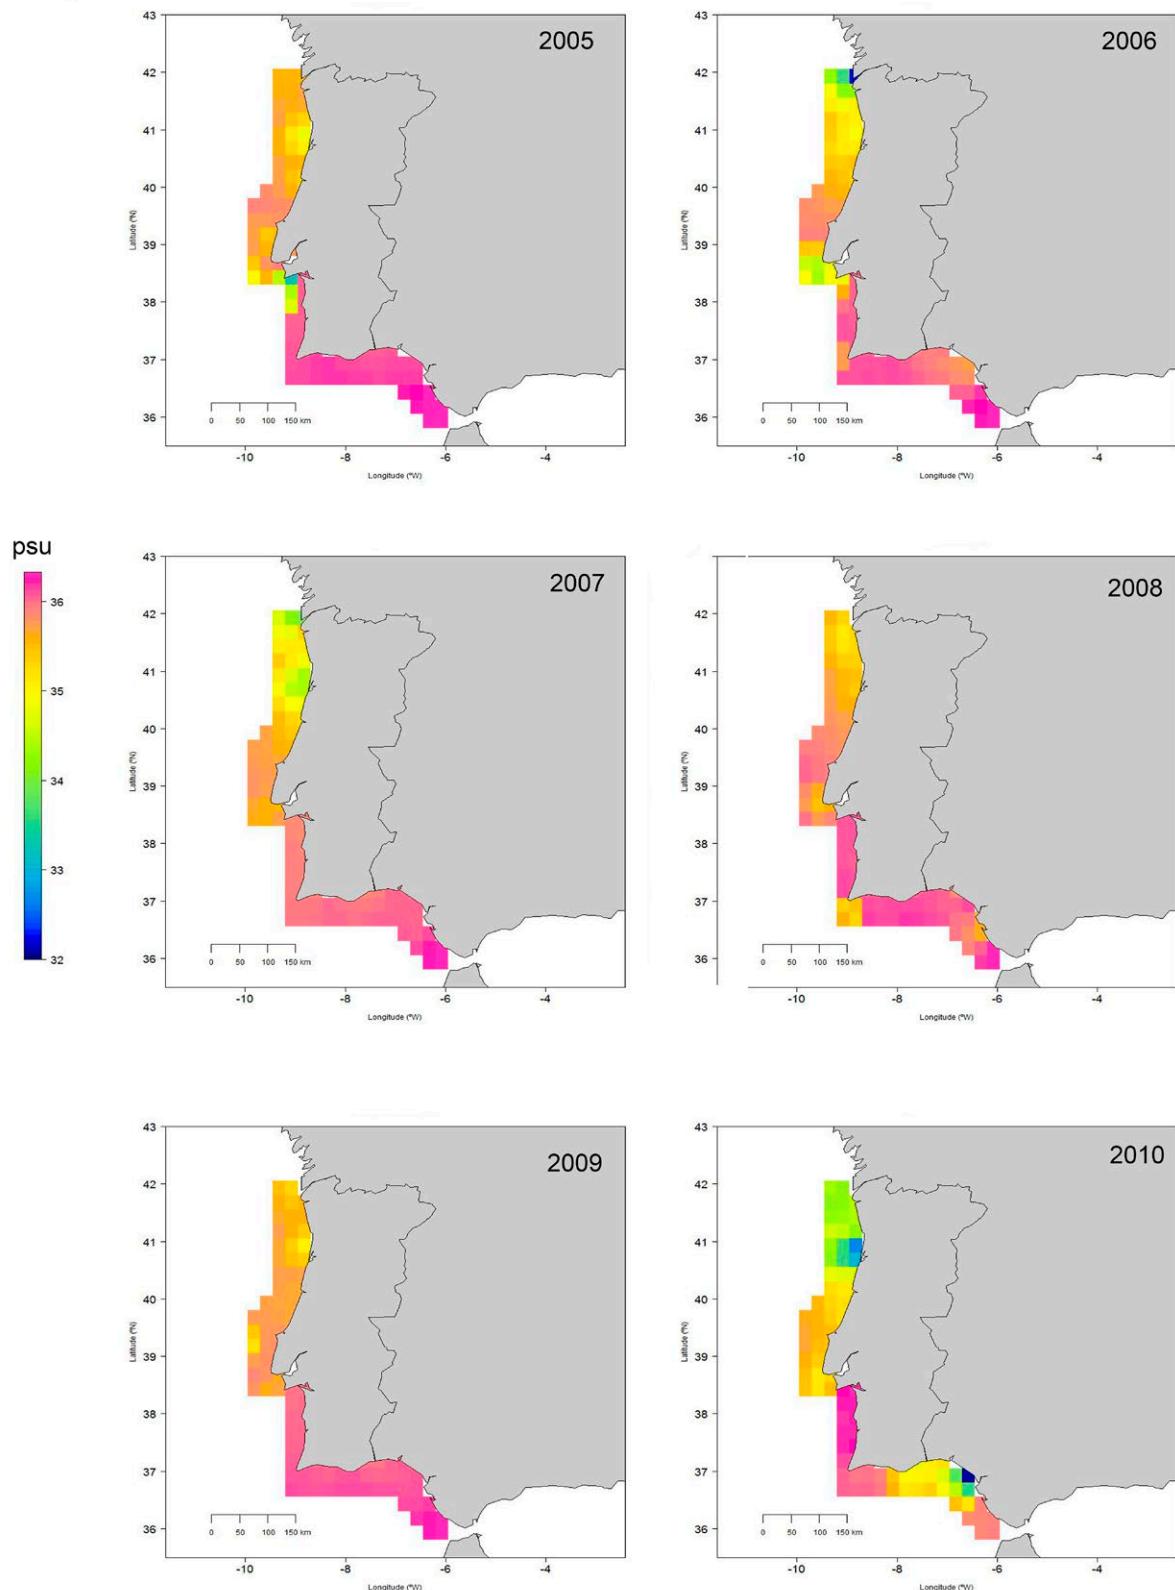

Fig. S1. – Spatial distribution maps of sea surface environmental variables and abundance of juveniles.

B: temperature

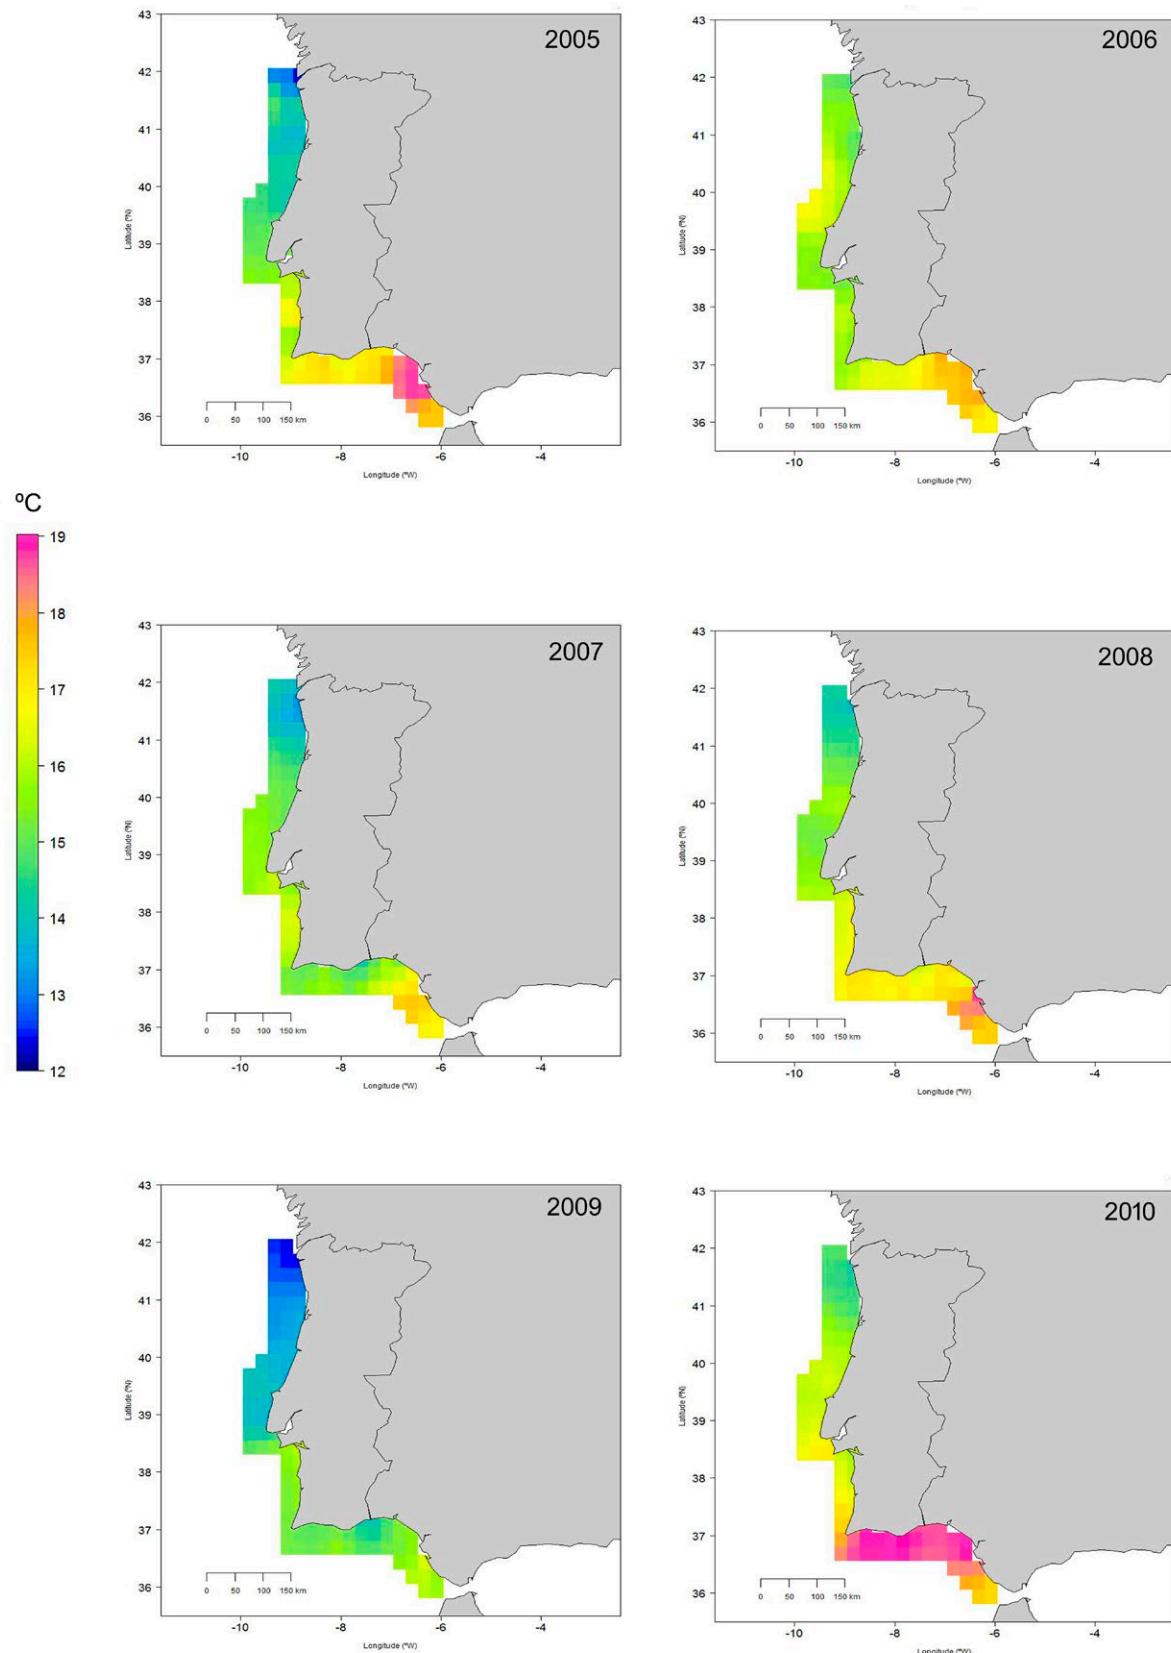

Fig. S1 (Cont.). – Spatial distribution maps of sea surface environmental variables and abundance of juveniles.

C: fluorescence

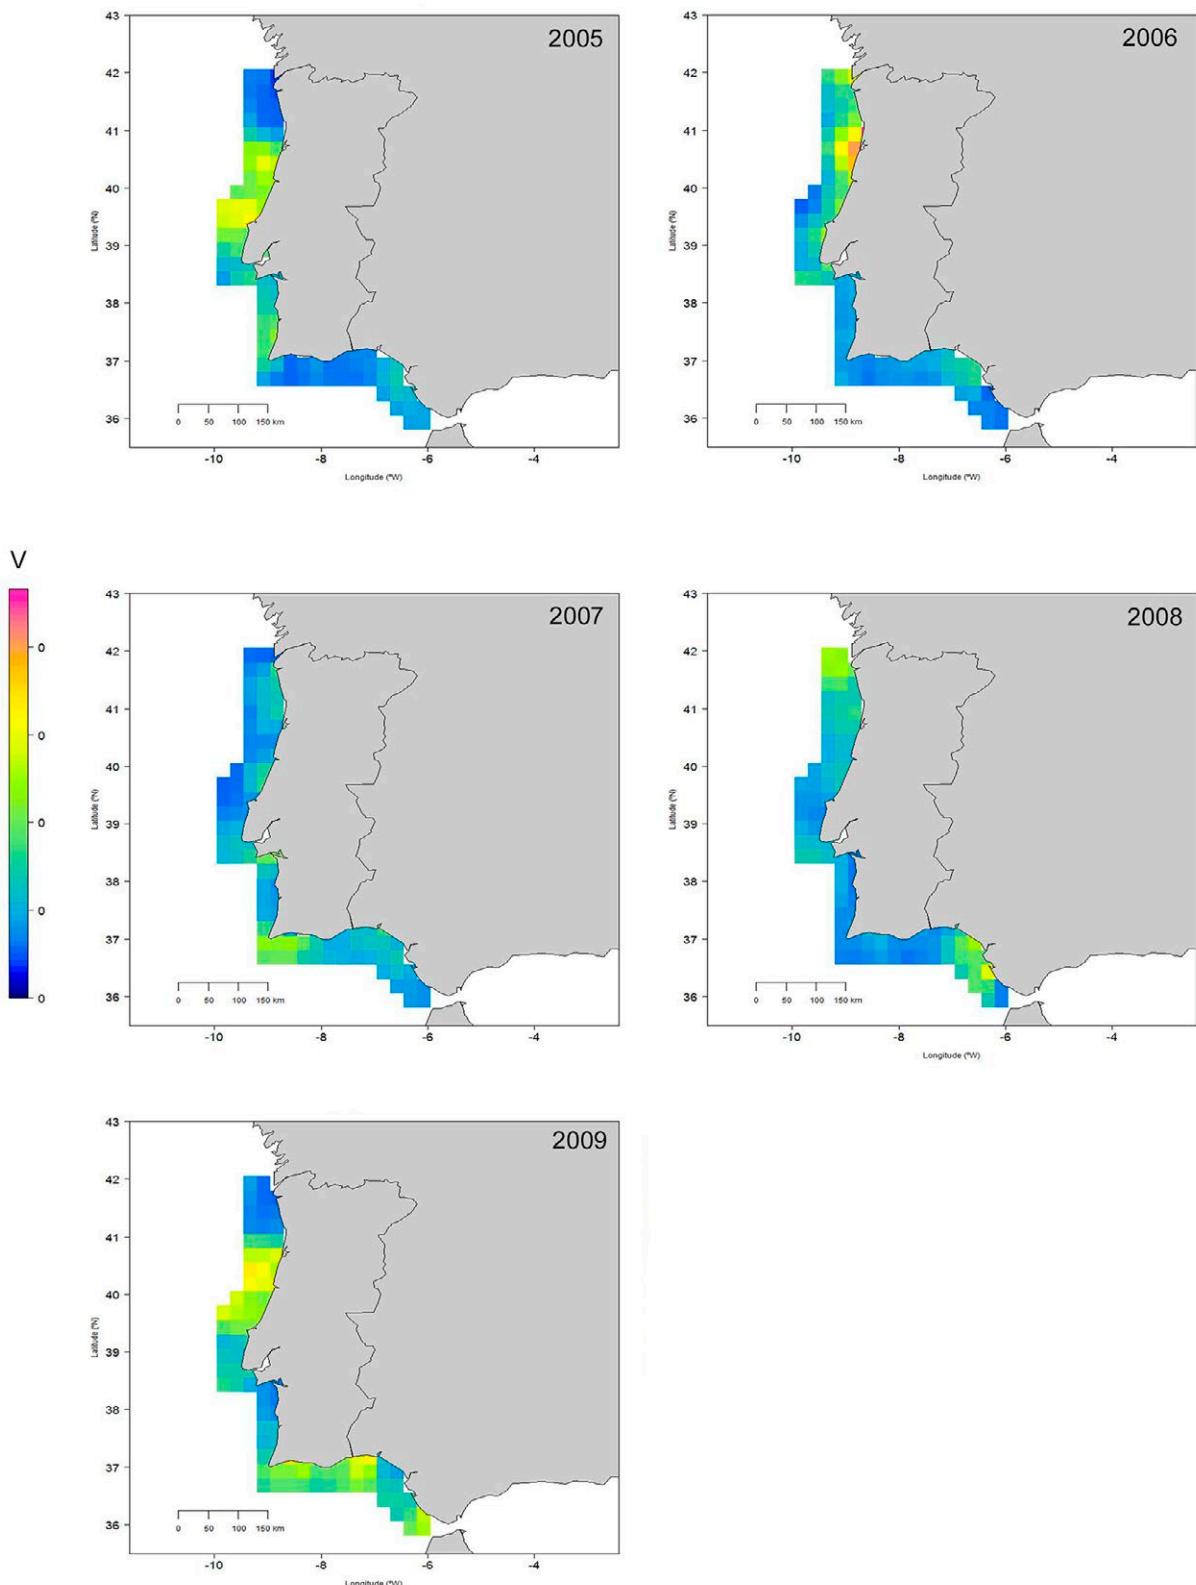

Fig. S1 (Cont.). – Spatial distribution maps of sea surface environmental variables and abundance of juveniles.

D: zooplankton volume

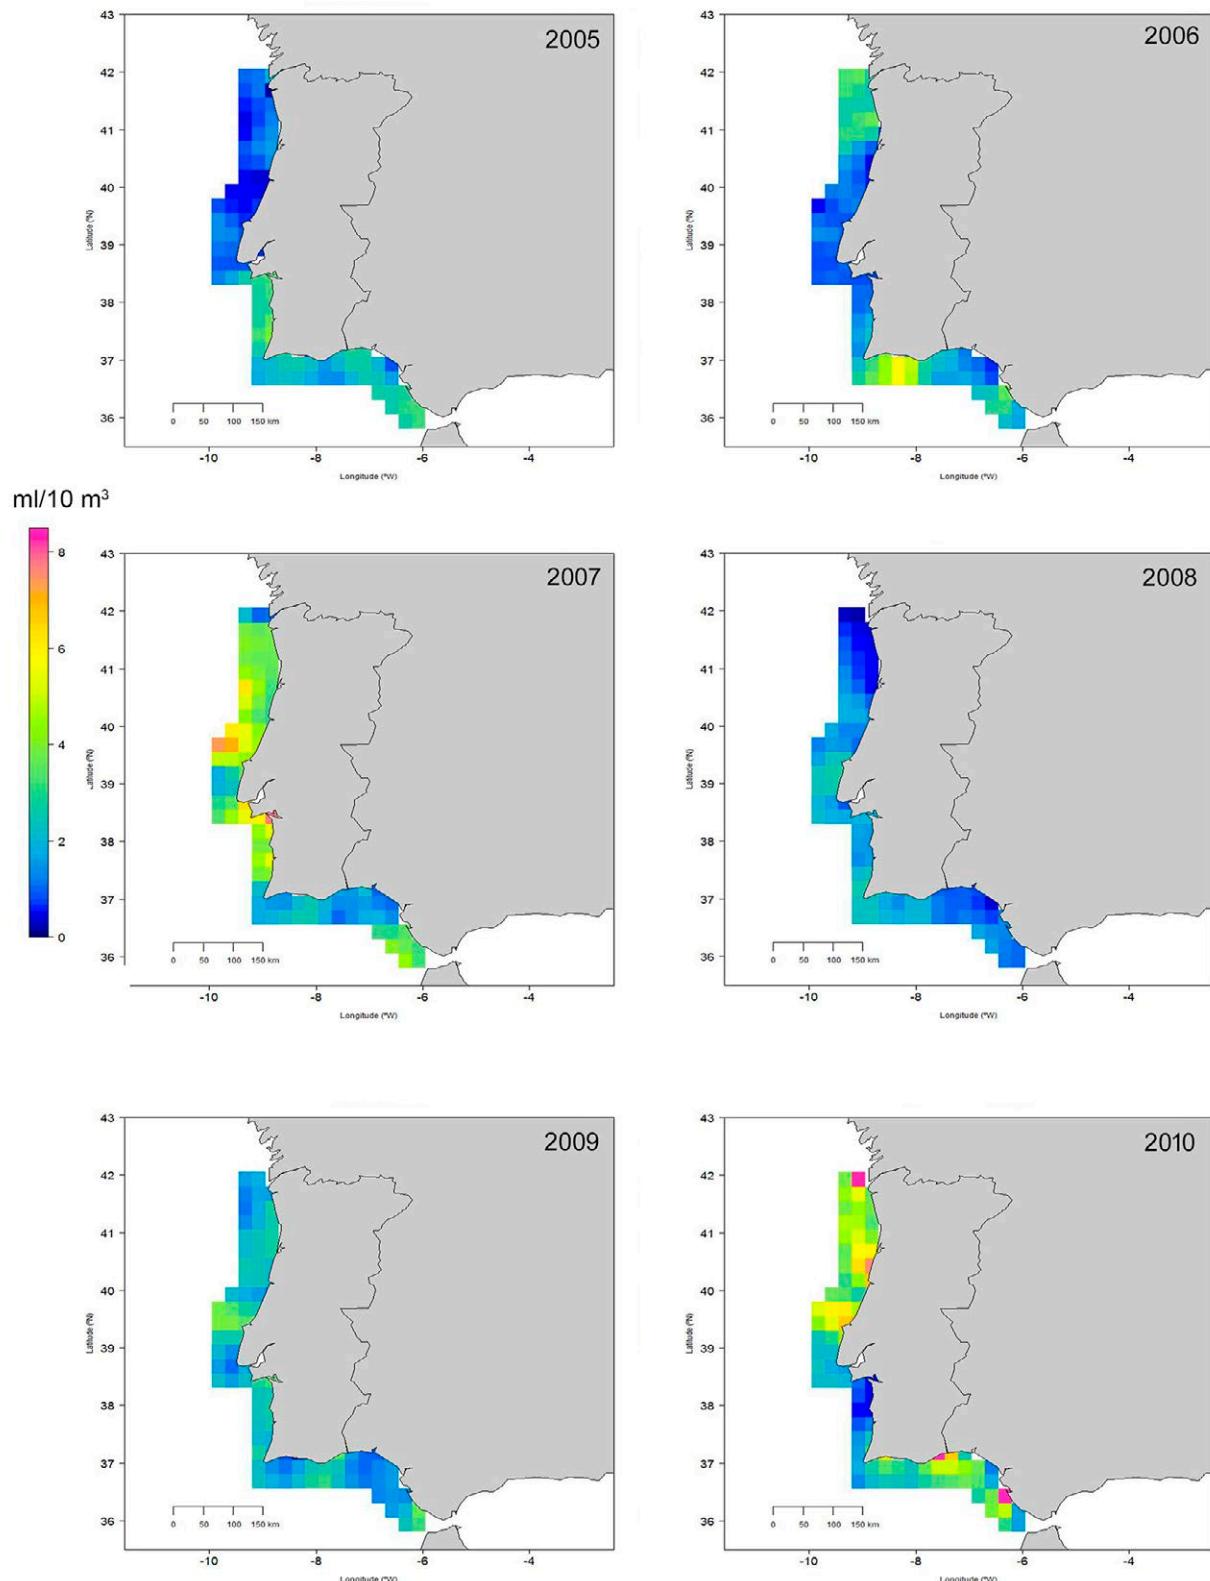

Fig. S1 (Cont.). – Spatial distribution maps of sea surface environmental variables and abundance of juveniles.

E. egg abundance

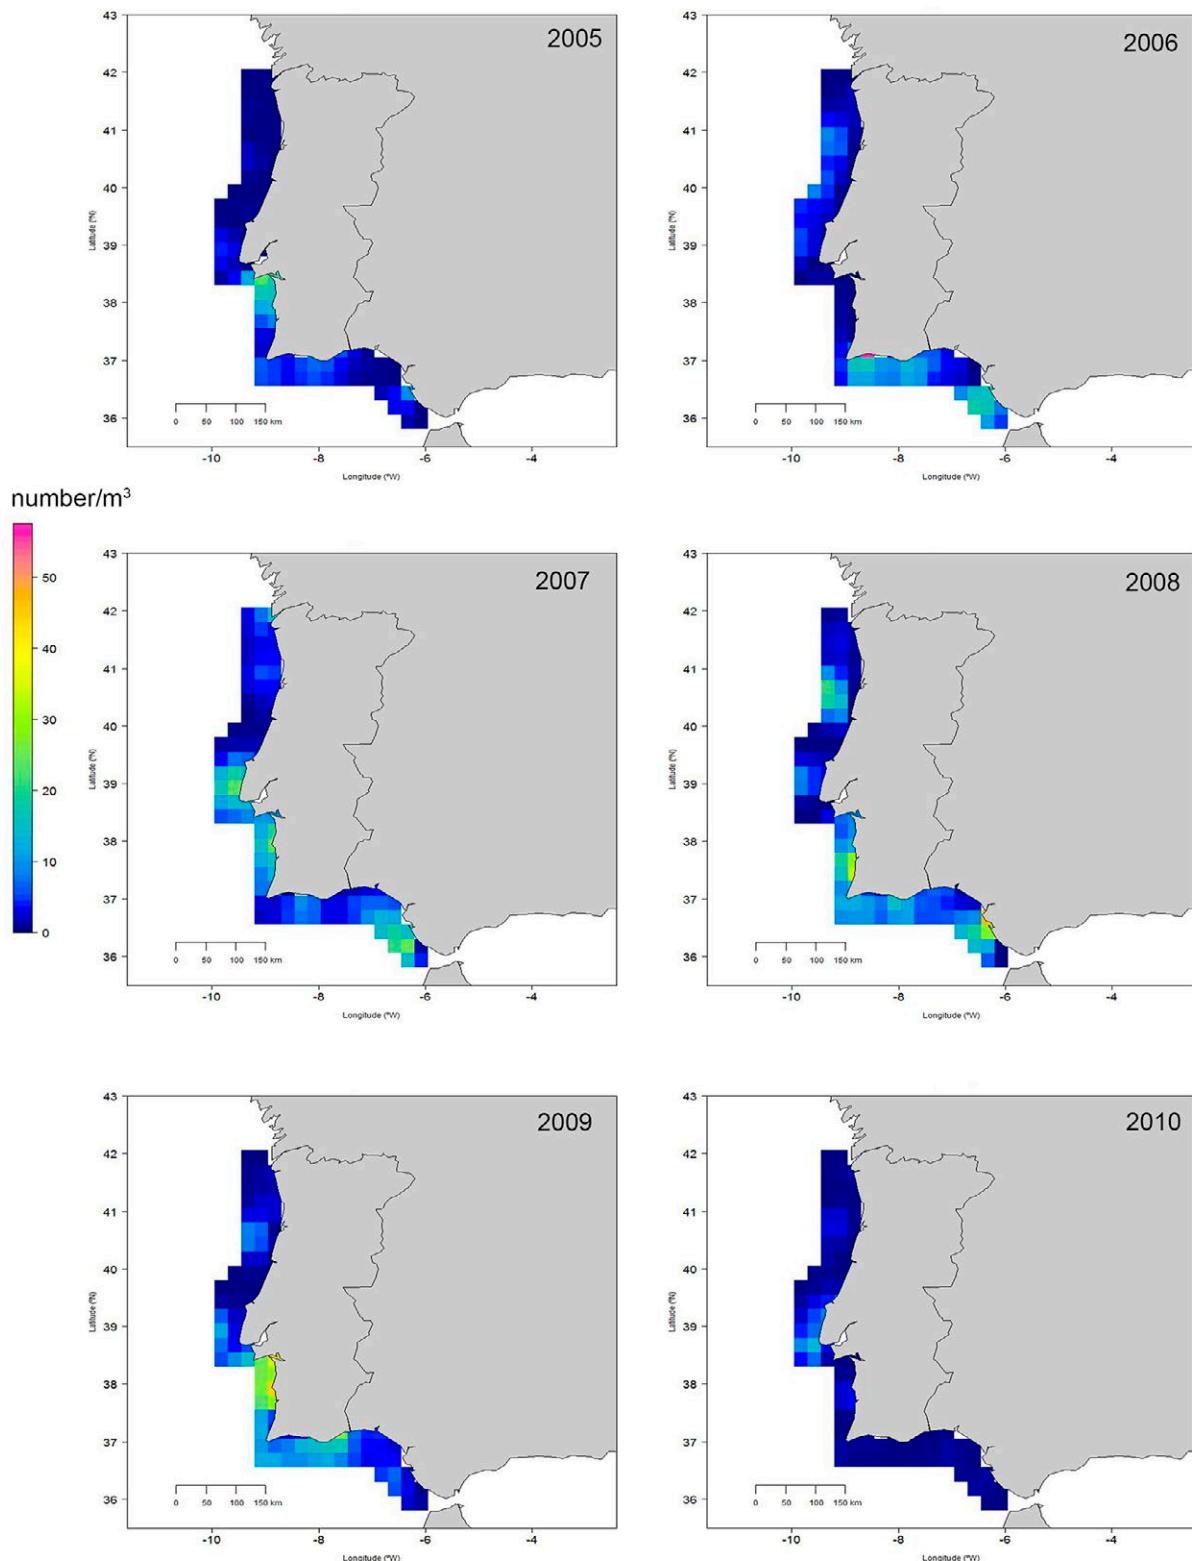

Fig. S1 (Cont.). – Spatial distribution maps of sea surface environmental variables and abundance of juveniles.

F: juvenile abundance

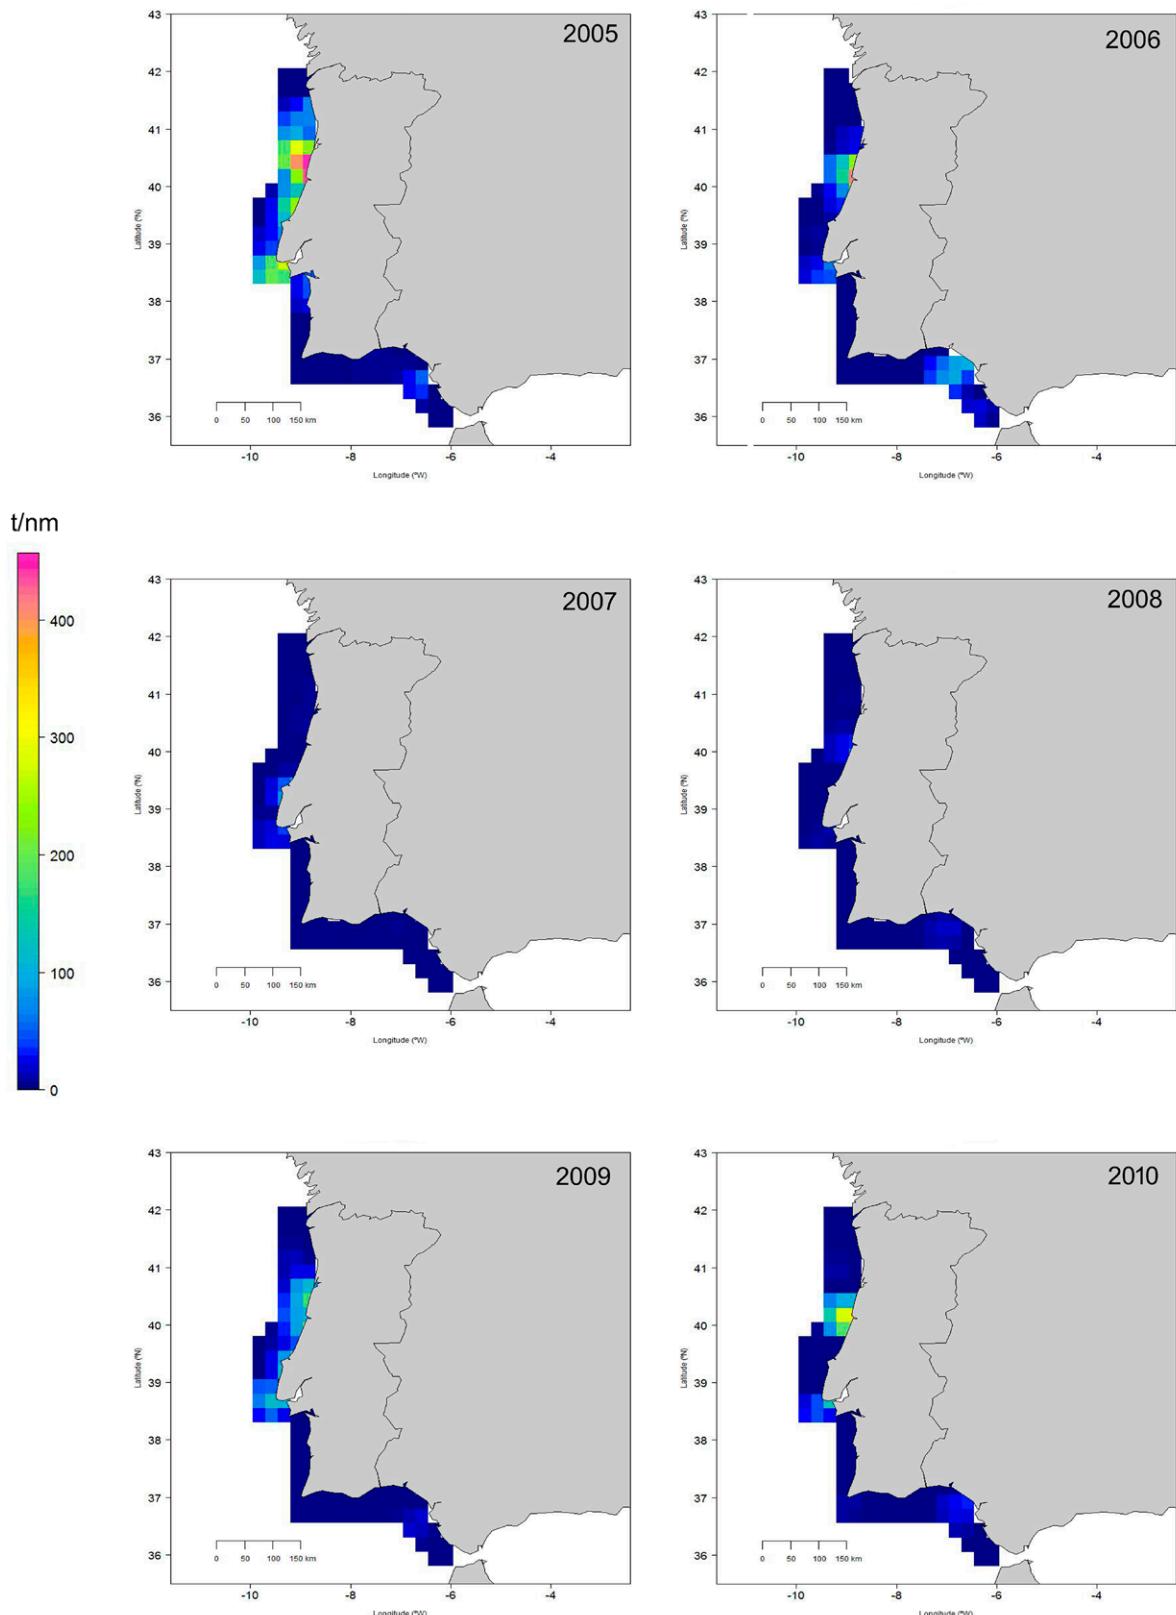

Fig. S1 (Cont.). – Spatial distribution maps of sea surface environmental variables and abundance of juveniles.
